

COVID-19 - Infection control measures at Sigtuna Stadshotell

The safety and well-being of our guests and our staff is of the utmost importance to us. Here you can read about our measures to reduce the risk of infection and to prevent the spread of the Corona virus so that your stay with us will be safe.

GOOD MEETINGS CAN CHANGE THE WORLD!

What is Sigtuna Stadshotell doing to reduce the spread of infection?

Due to the risk of spreading Corona, Covid-19, we have chosen to take a large number of measures to secure our stay with us.

It has never before been a greater advantage to be a small hotel than right now, and Sigtuna Stadshotell has only 27 five-star rooms.

Of course, we follow all the authorities' recommendations, that are certified by Visita "Safe to visit", have strict rules for our employees regarding hygiene, food handling and the spread of infection. During inspections, the authorities have praised our way of working.

Once in place, the small number of guests makes keeping distance easy. We sign of course and set a good example so that we do not forget the important distances.

Our public areas (toilets, counters, handles, etc.) are cleaned morning, afternoon and evening. We disinfect all the surfaces that you as a guest share with others. Even in conference rooms, the surfaces are wiped off when the group is on a break and hand sanitizer is always in the room.

The conference rooms are airily furnished and ventilated in the morning and after lunch. Feel free to consult with our conference department about suggestions for furnishing for an efficient and safe meeting!

All fruit and sweets that are in your conference room are safe to eat and packed for minimal contact with other people's hands.

Hand alcohol and / or hand washing are always close by.

Our lunches and dinners are always served at the table in an airy furnished dining room (which has been reduced by about 40% in number of seats). We can often also offer our own dining room.

Breakfast is served on a buffet BUT with rubbing alcohol, gloves and clean cutlery, always laid out on small plates for quick consumption. Room service or breakfast can be pre-ordered for a fee.

Coffee breaks are served to conference groups at your own buffet, which only your group takes from, and even here you can pre-order ready-made coffee dishes for your group.

Afternoon Tea offered on weekends is served directly at your place, both food and drink.

If you have participants who cannot participate on site, we help arrange webcast meetings.

You and our safety are our priority, so of course all of us who work are trained in first aid and defibrillators.

Welcome to an important and safe visit with us at Sweden's smallest five star hotel in Sweden's first city Sigtuna!

WE ARE SAFE TO VISIT

We also follow the industry organization Visita's recommendations and are "Safe to Visit". You can read more about what that means
